

## Sustainability & Environmental Policy

### Introduction

Aspen Build (East Anglia) Ltd is committed to minimising any adverse environmental consequences resulting from its activities and to maximise the potential for sustainability within its' business outcomes.

Compliance with environmental legislation relevant to the activities of Aspen Build (East Anglia) Ltd is a minimum requirement and ways to improve this and increase sustainability within its business operations are considered alongside economic factors when procuring goods, services and materials.

### Organisation

The ultimate responsibility for environmental and sustainability performance lies with the

Managing Director / Directors who will ensure that these factors are given equal priority with other business objectives.

All employees/workers of Aspen Build (East Anglia) have responsibilities with regards to environmental matters.

They are required to use and dispose of all materials in a manner which poses no avoidable danger to the environment.

Updates on Environmental Legislation are given to the Managing Director from our Health and Safety Advisor, Paramount Health and Safety.

### Arrangements

The Company seeks to heighten awareness of environmental matters by asking all employees/workers to consider the environmental implications of their actions and where appropriate, Aspen Build (East Anglia) will provide the necessary training and information to facilitate both awareness of the issues and best practice initiatives.

In our everyday activities we seek to minimise our environmental impact, reduce our energy requirements and emissions through CO2 emission analysis e.g. economic use of vehicles for each project whereby staff can travel together to site. We seek to recycle all waste as far as possible and only dispose of equipment when they are no longer fit for use.

Aspen Build (East Anglia) Ltd hold safety data sheets for all materials and substances relevant to the business activities. These are used and responsibly disposed of in accordance with manufacturer's guidance.

Should any complaints of an environmental nature be made, these will be dealt with by the Managing Director in consultation with the Health and Safety Advisor if necessary.
